## ABSTRACT

This paper presents the proactive steps taken by Idaho State University to address accountability in teacher education. The university addressed accountability mandates and new accreditation standards through a Web site (<http://www.ed.isu.edu>) that includes electronic documents providing evidence of meeting National Council for the Accreditation of Teacher Education (NCATE) 2000 and state standards. Through this Web site, the college makes visible the quality of its candidates, the richness of its educator preparation program, and its methods for assessing and documenting candidate performance relative to national, state, and institutional standards. Major aspects of the college's use of technology to support accreditation include: creating an infrastructure to ensure adequate expertise and resources; developing electronic exhibits; organizing accreditation events; aligning standards, program components, and assessments; collecting, analyzing, and storing data; and reporting assessment results for program improvement and accountability. Attached are a guide to the electronic exhibits and an index of electronic evidence. (SM)

## Creating Meaningful Accountability through Web-Based Electronic NCATE Exhibits.

## Creating Meaningful Accountability through Web-Based Electronic NCATE Exhibits

Stephanie Salzman  
Chuck Zimmerly  
Idaho State University

Over the last decade accountability in teacher education has emerged as a profound national priority. This priority demands greater accountability for teacher preparation programs through assessments that demonstrate the impact of graduates on PK-12 student learning (Darling-Hammond & Loewenberg, 1997) and more rigorous accreditation standards (NCATE, 2000). Adding greater complexity to this priority are the state and national mandates for colleges of education to address new academic standards for PK-12 students and to prepare individuals to teach in diverse classrooms and to integrate technology into teaching and learning.

These heightened national and state mandates for accountability create new roles and responsibilities for teacher education institutions including the creation of systemwide assessment systems linking candidate performance to student learning, integrating technology and diversity into program course work and field experiences, and documenting institutional performance relative to accreditation standards. As noted by the American Association of Colleges for Teacher Education (2001), educator preparation programs often find it difficult to respond proactively because of the extremely complex challenge of preparing new educators.

This paper presents the proactive steps taken by Idaho State University to address accountability through documentation of meeting NCATE 2000 standards via web-based electronic exhibits. For any teacher education institution seeking accreditation, NCATE review and state program approval represent major accountability tasks. The accreditation process is a thorough, comprehensive examination of the institution's performance relative to rigorous

standards addressing the unit's conceptual framework, assessment system, program components, faculty qualifications and performance, governance, and resources. Moreover, institutions are expected to provide documentation of the impact of their candidates and graduates on PK-12 students and the institution's use of assessment data for program improvement. At Idaho State University, we have addressed these accountability mandates and new accreditation standards through development and maintenance of an accreditation website [<http://ed.isu.edu>] comprised of electronic documents providing evidence of meeting NCATE and state standards.

Through our accreditation website, we expanded our use of electronic exhibits beyond fulfilling the requirements for accreditation to demonstrating accountability for a coherent mission inclusive of all educators. Our accreditation website makes visible the quality of our candidates, the richness of our educator preparation programs, and our methods for assessing and documenting candidate performance relative to national, state, and institutional standards. The conversion of our traditional document room to a dynamic electronic documentation and data management system has enabled university officials, faculty, other units on campus, and our partners in PK-12 schools instant and continual access to accreditation documentation and candidate performance data. Because the information is instantly accessible to all partners, data-based decisions for program approval have become part of our mission and the structure in which we and our partners do our work. Major aspects of our use of technology for the support of accreditation include (1) creating an infrastructure to ensure adequate expertise and resources; (2) developing the electronic exhibits; (3) organizing accreditation events; (4) aligning standards, program components, and assessments; (5) collecting, analyzing, and storing data; and (6) reporting assessment results for program improvement and accountability.

**Creating an Infrastructure and Resources.** Development of a web-based electronic accreditation website demands an infrastructure that includes a multi-disciplinary team, formal mechanisms for involving administrators and faculty in providing evidence, and technology resources including a server and multimedia software. Because the development of our accreditation website was a multimedia event requiring the skills of instructional design, multimedia authoring, content development, and graphics, we formed an “accreditation website team” to manage the work. Comprised of the Associate Dean, a technology specialist, and a secretarial support person, the team established a clear vision and structure for the website, worked with faculty to develop and accumulate the documents and exhibits, designed the website, and completed the multimedia authoring. Technology resource requirements included a large-capacity server and multimedia authoring software.

An essential component of the development of our accreditation website was our use of an instructional design model (Kemp, Morrison, & Ross, 1999) as a planning framework. Through this model, we identified the purpose of the website, examined the needs of the BOE and state review team members, identified subject content, analyzed task components related to the purpose of the website, and sequenced the content in a logical manner. Consistent with the instructional design model, we also designed the format for an organized and clear presentation of documentation and developed evaluation instruments to assess the usability and usefulness of the accreditation website. Once the planning and design phases were completed, we began the process of developing the electronic exhibits presented through the website.

**Developing the Electronic Exhibits.** Our accreditation website is comprised of 137 separate documents providing evidence of meeting NCATE standards and 37 documents

providing evidence of meeting state standards. Organized by NCATE and state standards and elements, the electronic exhibits consist of a series of selection menus and Portable Document Format (PDFs) that can be viewed or printed in hard copy. The PDF documents provide the evidence relative to each of the elements of the NCATE standards and the state program approval standards. For example, relative to NCATE *Standard 2. Assessment System and Unit Evaluation*, documents are organized by the elements of the standard (e.g., Assessment System; Data Collection, Analysis, and Evaluation; and Use of Data for Program Improvement). With the electronic exhibits organized by NCATE and state standards, the BOE and state team members can navigate quickly, in four or less clicks, to retrieve evidence relative to a specific standard or standard element in PDF format. Each page of the website contains an accreditation banner with the College of Education conceptual framework logo, an appropriate title indicating the standard and its elements, a series of selections, and a brief description of content. Our accreditation website differs from other accreditation websites currently available on the Internet in that our electronic exhibits can be accessed in two ways: (1) links from the standards and (2) hot links embedded in the institutional report.

**Organizing Accreditation Events.** In addition to providing links to evidence relative to NCATE and state standards, our accreditation website serves as a mechanism for organizing accreditation events. An essential component of the website is the link to the site visit schedule and visit guide. The guide lists all of the off-campus and school visits and meetings scheduled for the visit along with lists of participants and descriptions of schools visited by the NCATE BOE and state program approval teams. We have structured the visit guide in such a way that lists of interview participants can be directly downloaded by team members as they prepare their

final reports. The posting of the visit schedule on the accreditation website also serves as an easily accessible reference for college and university personnel and our PK-12 student partners.

**Aligning Standards, Program Components, and Assessments.** Our accreditation website provides the mechanism through which we collaborate with our partners in other units on campus responsible for the preparation of teachers and other school personnel. For example, to begin the work of creating our accreditation website, we posted both the NCATE and state standards along with a format for developing documents showing the alignment between national, state, and institutional standards, program components, and assessments. Units across campus then developed alignment documents that were posted on the website for all to review. We used this same process to develop assessment plans and summary documents showing where in each program the NCATE standards relative to field experiences and diversity are addressed.

**Collecting, Analyzing, and Storing Data.** The accreditation website also provides the mechanism through which data from our program assessment systems are regularly and systematically compiled, summarized, analyzed, and reported publicly for the purpose of improving candidate performance, program quality, and unit operations. Our accreditation website links to tracking databases that serve as critical aspects of our data management processes. Through our tracking databases, we manage data on candidate performance; track candidate progress relative to program admission, retention, and graduation requirements; and conduct data analyses to prepare summary reports for internal and public dissemination. Through the functions of collecting, analyzing, storing, and reporting data, the accreditation website expands accreditation into a continuing self-study process that, as noted by Samaras et al. (1998), is “essential to improving the status of the profession” (p. 14).

**Reporting Assessment Results for Program Improvement and Accountability.** Through the posting of summary reports of assessment results on the accreditation website, we and our partners can continuously and systematically reflect on candidate performance data. This immediate and ongoing availability of data and information about candidate performance and program quality provide the infrastructure through which we share accountability responsibilities with other units on campus and our PK-12 school partners.

The process of designing and maintaining the accreditation website brought our educator preparation programs, other units in the institution, and our school partners together to support a seamless comprehensive educator preparation model. Moreover, the development and implementation of web-based electronic exhibits and the concomitant dedication of resources, research, and time represent our commitment to being publicly accountable for the preparation of quality educators who support the learning and well-being of all students.

## Guide to Electronic Exhibits

<http://ed.isu.edu>

Our exhibits for continuing accreditation are comprised of both electronic exhibits accessed via the Internet and supporting printed documents. Both types of evidence are available in hard copy to the BOE and the state program approval team in the Evidence Room in the College of Education. **While the electronic exhibits represent the major portion of evidence relative to the NCATE and state standards, critical documents are found in the Exhibit Room only.** This document serves as a guide to accessing and using the electronic exhibits.

### Organization of Electronic Exhibits

Organized by NCATE and state standards and elements, the electronic exhibits consist of a series of selection menus and Portable Document Files (PDFs) that can be viewed or printed in hard copy. The PDF documents provide evidence relative to each of the elements of the NCATE standards and the state program approval standards.

With the electronic exhibits organized by NCATE and state standards, the reviewers can navigate quickly, in four or less clicks, to retrieve evidence relative to a specific standard or standard element in PDF format. The reviewer may return to any level of the electronic exhibits by closing the PDF and selecting the desired point of return from the yellow navigation bar at the bottom of every page. All links are designated by blue underlined print. As shown in the example page below, each page contains an accreditation banner with the College of Education conceptual framework logo, an appropriate title indicating the standard and its elements, a series of selections, and a brief description of content.

### Standard 2: Assessment System and Unit Evaluation

Assessment System

Data Collection, Analysis,  
and Evaluation

Use of Data for Program

Improvement

Advising Systems

The College of Education has an assessment system that collects and analyzes data on applicant qualifications, candidate and graduate performance, and unit operations to evaluate and improve our programs, instruction, and services.

NCATE

Accreditation

## Navigation of Electronic Exhibits

Navigation of the electronic exhibits is from general (the Accreditation Main Menu) to specific evidence relative to the standards and standard elements (PDF documents). Navigation is accomplished through a series of electronic menu selections.

Return navigation is accomplished by selecting the point of return from the yellow navigation bar located at the bottom of each menu. The PDF document must be closed (by clicking on the “X” in the box in the upper right hand corner of the screen) to return to the main menu from which the document was selected. The selection farthest to the left on the yellow navigation bar is one step back. As shown in the diagram below, the NCATE selection returns the reviewer to the NCATE Main Menu. The Accreditation selection returns the reviewer to the Accreditation main menu.

## Content of the Electronic Exhibits

All PDF documents are written in and identified by specific NCATE or state terminology. For example, for Standard 2: Assessment System and Unit Evaluation, there are PDF documents providing evidence relative to *assessment system; data collection, analysis, and evaluation; and use of data for program improvement*. Each PDF document provides evidence of meeting a specific element of the standard.

The table on the following pages serves as an index of evidence accessed via the electronic exhibits. Printed copies of these documents and additional evidence are located in the Exhibit Room.

Publication Date:

FEB 24, 2002

## II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign at the bottom of the page.

The sample sticker shown below will be  
affixed to all Level 1 documents

PERMISSION TO REPRODUCE AND  
DISSEMINATE THIS MATERIAL HAS  
BEEN GRANTED BY

CLEARINGHOUSE ON TEACHING  
AND TEACHER EDUCATION

November 1, 2001

Dear AACTE Presenter:

The ERIC Clearinghouse on Teaching and Teacher Education invites you to contribute to the ERIC database by providing us with a copy of your paper presented at AACTE's 54<sup>th</sup> Annual Meeting (New York, NY, February 23-26, 2002). Abstracts of documents that are accepted by ERIC appear in the print volume, *Resources in Education* (RIE), and are available through computers in both on-line and CD-ROM versions. The ERIC database is accessed worldwide and is used by teachers, administrators, researchers, students, policymakers, and others with an interest in education.

Inclusion of your work provides you with a permanent archive and contributes to the overall development of materials in ERIC. The full text of your contribution will be accessible through the microfiche collections that are housed at libraries throughout the country and through the ERIC Document Reproduction Service. Documents are reviewed and accepted based on their contribution to education, timeliness, relevance, methodology, effectiveness of presentation, and reproduction quality.

To disseminate your work through ERIC, you need to fill out and sign the **Reproduction Release Form** located on the back of this form and include it with a letter-quality copy of your paper. You can mail the materials to: **The ERIC Clearinghouse on Teaching and Teacher Education, 1307 New York Ave., N.W., Suite 300, Washington, D.C. 20005**. Please feel free to photocopy the release form for future or additional submissions.

Should you have further questions, please contact me at 1-800-822-9229; or E-mail: [lkelly@aacte.org](mailto:lkelly@aacte.org).

Sincerely,

A handwritten signature in black ink, appearing to read "Linda M. Kelly". The signature is fluid and cursive, with the first name "Linda" and last name "Kelly" being the most prominent parts.

Linda M. Kelly  
Acquisitions and Outreach Coordinator
